What Does My Tuition Cover?

Tuition covers all expenses related to instruction at the university, including

- Instructor salaries
- Creation and maintenance of classrooms
- Creation and maintenance of study spaces
- Disposable supplies for teaching, activities and labs (materials owned or leased by students are covered by other fees)
- Utilities
- Research that supports instruction and discovery
- Libraries

5% of tuition revenue goes directly into student financial support, approx. \$23.2M (2024-25)

What Drives a Tuition Increase?

01. Increases in our cost drivers

- **Salaries and benefits** - merit compensation and benefit increases (57% of costs)
- **Materials and supplies** (18% of costs)
- **Utilities** (3% of costs)
- **Maintenance** (4% of costs)

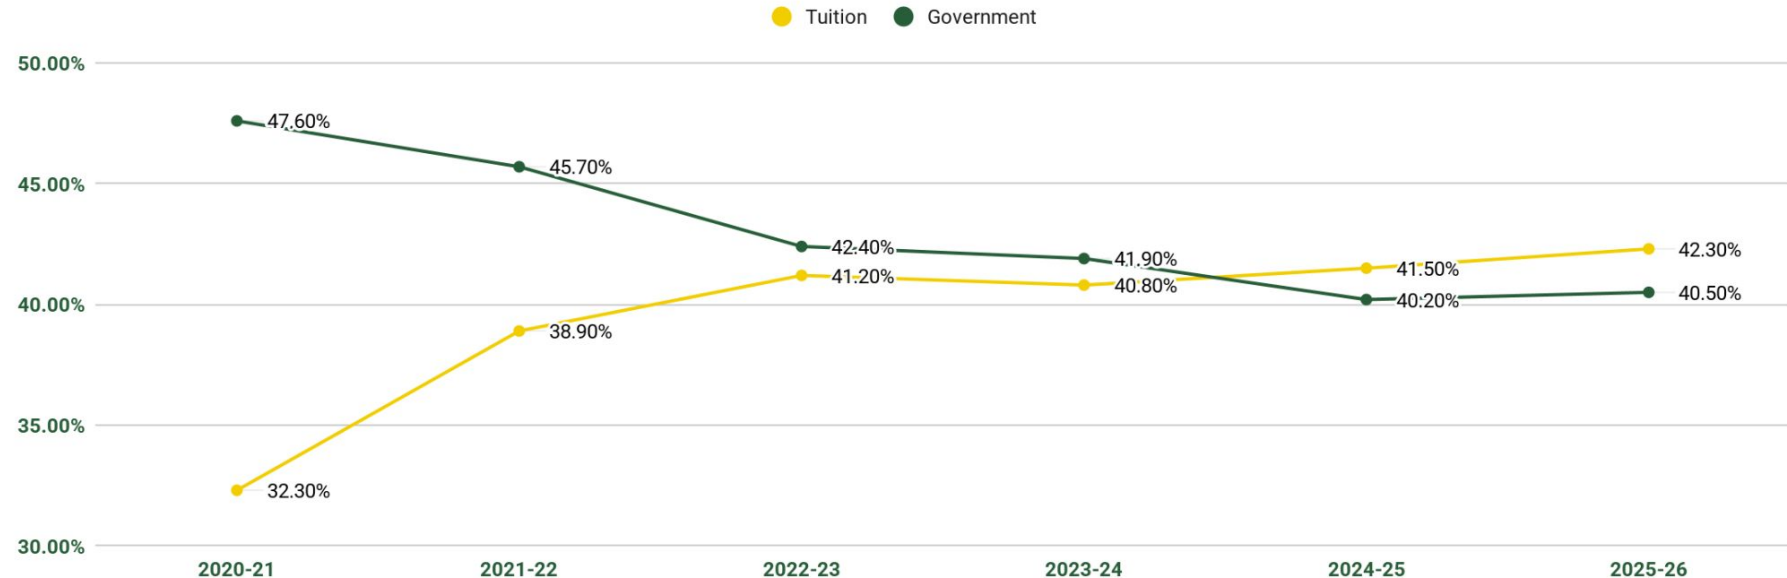

02. Gaps in our revenue

- Government grants are not expected to increase to support instruction broadly

03. A desire to maintain quality of instruction and academic mission

The Context - Revenue and cost balance

Government funding and tuition as share of University of Alberta operating income

Tuition Impacts

- In Fall 2025, the gap between the 2% increase to domestic tuition and an increase at CPI resulted in a \$3M revenue gap for the University.
 - In Fall 2024, that gap was \$7M.
- If we did not pursue the 2% increase for Fall 2026, the university revenue would be reduced by \$5M.
- Areas impacted by that reduction would include the student experience, supplies, maintenance and repairs, classroom upgrades, cleanliness, etc.

2026/27 Domestic Tuition Increase Proposal

Domestic tuition increase for Fall 2026: 2%

- Undergraduate and graduate
-
- Currently, domestic tuition offset funding held at \$8.5M.
 - Discussions underway for adjustment to further ensure predictability in an ongoing way for students.

Fall 2027 International Tuition Proposal

Undergraduate

- 5.5% increase for new students in Fall 2027.
- Exceptions:
 - Harmonization of Computing Science tuition to Engineering [~26% proportional increase].
 - Harmonization of Nursing to peer institutions [~20% increase].
- International tuition offset of 8.55% of total international tuition revenue continues.
